SAFETY & TESTING

Our machines are designed with operator safety in mind. The flexible shaft rotates inside a protective casing which makes it safe to hold. All Millers are also fitted with a safety clutch, a shielded operator presence foot control and an emergency stop button. Before leaving Picote, ALL Millers undergo rigorous testing to ensure they meet our high quality standards.

BATTERY SUPER POWERED MILLERS!

The Mini Miller and Cleaner concepts have been upgraded with a portable power source, new dedicated brushless DC motor, new angle gear and electronic clutch to give a powerful, smooth and quiet experience with no trailing cables. While these look similar, they are significant upgrades to the standard 8mm machines. We have renamed them the Battery Super Mini Miller and Battery Super Mini Cleaner.

The Standard and High-Output Batteries allow for operation times of up to 3 and 4 hours, respectively. You can even charge the battery while using the machine. Welcome to the next generation!

CLEANING CHAINS

Premium Chains

Larger and heavier U carbide (7-ridge) makes it stronger and faster than any other chain on the market. A versatile tool for cast iron pipes. For tough descaling, hard deposits and removing residual concrete or failed liner, including inconsistencies, wrinkles and remains.

Tiger Chains

Fits in between the Standard & Premium versions. Equipped with extra-hard, very long lasting carbide teeth with a lighter chain material to create a gentle but extremely durable option for cleaning cast iron pipes.

Standard Chains

Star carbide (3-ridge). An efficient general cleaning chain. Suitable for clay, concrete and cast iron pipes.

PVC Chains

No carbides. General cleaning chain to restore flow quickly and safely or to remove light roots in fragile pipes such as plastic, copper & clay.

EXPAND YOUR OPTIONS

Picote Brush Coating™ gives you options when rehabilitating pipes to prolong the lifespan. Clean the pipe well and apply two coats for a corrosion barrier. Alternatively, apply additional coats of resin to form a seamless new semi-structural pipe, providing a solution that should last 30-50 years.*

Benefits: Extend the service life of a pipe, stop corrosion, create a new pipe, "patch" on top of a compatible CIPP lining and fortify connections. Improve quality control with the dual color cartridge system.

*Number of coats depends on pipe diameter.

MINI & MAXI COATING SYSTEM

DUAL COLOR EPOXY

Add a Mini or Maxi Coating Pump to the Miller for a portable, compact system. Alternate between the grey and white resins so that you can easily visually verify each layer. Apply to small areas or all drains in multi-story buildings. Use with the Smart Mixer 2.0 for a simple and mess-free solution. ASTM AND NSF/ANSI 61-5 approved.

PICOTE BRUSH COATING™

XPRESS COATING SYSTEM

Picote's new Xpress Coating System for DN32-300 pipes provides faster curing times, no waste, less mess, and minimal setup time for revolutionary cost and time savings.

The heart of the system is Picote's innovative Xpress Coating Pump featuring dual hydraulic resin cylinders for the new 1:1, single color epoxy. It has a built-in 24v, 882Wh battery and internal resin heater providing several hours of working time (it can also be operated while charging).

The system also includes a motorized Delivery Hose Reel that stores 40m of delivery hose on board (two hose sets on each reel) allowing for easier setup, movement, and storage.

MIDI ROLLER & WET-OUT STATION

*Compact, battery powered unit
allows you to work anywhere*

Great value at an affordable price!

Easily wet-out CIPP liners from DN50-225 on site. The hybrid Midi Roller is battery operated (up to 10h working time), chargeable while in use, and can be run indefinitely while plugged into a power outlet. It comes with variable speed and bi-directional controls. Upper roller lifts up making wet-out faster and easier. Use as a stand alone roller, or add to the Wet-Out Station to build a complete 150cm portable and powered wet-out unit.

Picote Cannon

Shoot liners from DN50 with the Picote Cannon. This compact and transparent installation tool is perfect for tight spaces where a drum won't fit for installing DN50-DN100 liners. The Fast Lock System means you can move on to the next liner, shooting multiple lines in quick succession. Comes with Picote Cannon Air Sealing Package, which allows a CCTV camera to be pushed through the Cannon into the pipe. View the inflated liner throughout the curing process.

UPGRADED! INSTALL T OR Y CONNECTION COLLARS WITH EASE

Picote's upgraded Connection Collar System seals main line and lateral connections protecting against infiltration and exfiltration. Access from main line or lateral. The fully taped Connection Collar seams eliminate the risk of resin leakage to create a high-quality connection and the black seam thread makes it very easy to visually line up the connection for perfect installations — with optional steam curing for even faster project completion.

The flexible Push Rods provide a solution that is both strong and rigid enough for pushing and rotation, while also flexible enough to navigate multiple bends. Go further, simply connect as many Push Rods as you need.

Three Installation Tool Head sizes available.

Tool Heads can be used for both ambient and steam curing. The two-way Installation Tool gives added versatility.

PICOTE 3D PACKER

The Picote 3D Packers are designed for straight repairs in pipes and can repair multiple dimensional offsets. These packers can be pushed through several bends to the renovation location through the innovative and patented Front Wheel Drive system which allows them to travel longer distances and navigate through multiple 90° bends.

NEW! PICOTE PRO PACKER SERIES

The Picote Pro Packer series offers upgraded tools with new innovation. When needed, navigational guides assist the packer through various pipe bends and turning into secondary lines.

PRO PACKERS

PICOTE BENDY PACKER

The Picote Bendy Packers are specially designed for repairs in pipe bends but work great in straight sections too! They expand from the middle to ensure a wrinkle-free end result. These packers can be pushed through several bends to the renovation location through the innovative and patented Front Wheel Drive system which allows them to travel longer distances and easily navigate through multiple 90° bends.

WIPE OUT THE COMPETITION!

Special Drill Heads can easily cut into tough blockages such as tree roots, grease, heavy scale, or tuberculation and can be used to unblock pipes in order to make space for larger tools to follow.

Special Drill Heads can be attached in front of Picote Original Grinding Chains to create an initial opening in the blockage to then allow the chains to open and better perform their cleaning function.

They can also be used to create an initial CIPP connection opening in pipes when larger tools like the Twister cannot fit, or where a Front Drill Head and Front Panel cannot be attached to a Smart Cutter™.

SPECIAL DRILL HEADS & TIGER BORES

The **Tiger Bore** is highly efficient at reinstating lined connections and opening up blockages. It is also effective for cutting through collapsed liners to make room for larger removal tools to follow as well as for removing grout & concrete in small diameter pipes.

Special Drill Head Cutter 20x29 for DN32-40 Pipe - 8mm Shaft € 152.00

1310820029

Reinstatements & Cleaning (8mm Shaft)

For use in cast iron pipes for initial liner opening and blockages. Square design/side blades allow the cutter to tumble on obstacles/connections to make hole larger than physical size of drill head. Measurement: 8(S)x20(D)x29(L).

Special Drill Head Cutter 20x42 for DN50 Pipe - 8mm Shaft € 163.00

1310820042

Reinstatements & Cleaning (8mm Shaft)

For use in cast iron pipes for initial liner opening and blockages. Square design/side blades allow the cutter to tumble on obstacles/connections to make hole larger than physical size of drill head. Measurement: 8(S)x20(D)x42(L).

Special Drill Head Cutter 30x55 for DN50-75 Pipe - 8mm Shaft € 186.00

1310830055

Reinstatements & Cleaning (8mm Shaft)

For use in cast iron pipes for initial liner opening and blockages. Square design/side blades allow the cutter to tumble on obstacles/connections to make hole larger than physical size of drill head. Measurement: 8(S)x30(D)x55(L).

Special Drill Head Cutter 30x55 for DN70-75 Pipe - 10mm Shaft € 175.51

1311030055

Reinstatements & Cleaning (10mm Shaft)

For use in cast iron pipes for initial liner opening and blockages. Square design/side blades allow the cutter to tumble on obstacles/connections to make hole larger than physical size of drill head. Measurement: 10(S)x30(D)x55(L).

Special Drill Head Cutter 40x71 for DN70-75 Pipe - 10mm Shaft € 182.54

1311040071

Reinstatements & Cleaning (10mm Shaft)

For use in cast iron pipes for initial liner opening and blockages. Square design/side blades allow the cutter to tumble on obstacles/connections to make hole larger than physical size of drill head. Measurement: 10(S)x40(D)x71(L).

Special Drill Head Cutter 30x55 for DN70-75 Pipe - 12mm Shaft € 175.51

CUT BACK ON COSTLY MISTAKES

When lining towards a main or connection it is possible that the installation may inadvertently extend past the end of the pipe. This can create blockages and backups which can cause significant damage and expense. In these situations, Picote Pipe Cutters are fantastic tools to quickly and easily remove an overshoot lining that has extended into a connection. Simply attach the Pipe Cutter to your Miller, push it in place from the lateral and quickly cut off the excess lining.

DN70 Pipe Cutter can be operated by the Mini, Super Midi, or Maxi Miller.

DN100 & DN150 Pipe Cutters can be used with the Super Midi and Maxi Miller.

DN200 Pipe Cutter Ultra Flex can be combined with the Maxi Miller.

PIPE CUTTER

The **Standard Pipe Cutters** are sold as a panel pack that is combined with a Smart Cutter™ hub to create the final assembly.

The **Pipe Cutter Ultra Flex** is self-centering and designed for cutting off overshoot linings that occur directly after a bend.

There are two Pipe Cutter models – the **Standard** and the **Ultra Flex**. The Standard and Ultra Flex models feature panels with hardened steel button teeth and both can navigate bends up to 90°.

MAKE A GRAB FOR IT

The Grabber is a must-have on every job site. It allows you to quickly retrieve lost tools or foreign objects blocking a pipe, avoiding costly and time-consuming excavation.

The Original Grabber is designed for pipes of DN100 diameter and above, and the Large Grabber can be used in DN150 and larger pipes.

 Check out our video on Grabbers at:
[YouTube.com/PicoteSolutions](https://www.youtube.com/PicoteSolutions)

PICOTE GRABBERS

Original Grabber DN100+ | Large Grabber DN150+

While viewing the location with your CCTV camera, simply push the grabber into position. The grabbing head is easily rotated so you can locate and grip the item with precision. Then, simply turn on the air valve to get a rock-solid grip on the object to pull it out and retrieve it. Turn off the air to release.

LEAD THE WAY

Leaders are pre-built, allowing the operator to quickly switch between different tooling in the field. Using Leaders saves time and extends the life of the flexible shaft.

Leaders are attached to the shaft via a shaft connector, ensuring the optimal amount of shaft is exposed outside of the outer casing. Many Picote tools can be built with Leaders, which is especially beneficial for Original Chains, Cyclone Chains and Smart Cutter™ Hubs.

Check out our video on Leaders at:

DON'T LIMIT YOURSELF! GO FURTHER WITH PICOTE ROBO TOOLS

Larger pipes require bigger tools and a longer reach. When this is the case, Picote has a robotic tool range that is designed to be fitted to the world renowned Schwalm Talpa Robot. Together with Schwalm's engineering team, Picote has created tools that can perform challenging tasks such as grinding, cutting and cleaning. It is also possible to grab lost items or remove obstructions with the Grabber pincher jaws mounted on board with an HD camera for precision work.

DON'T WASTE TIME AT THE WORKSITE!

Picote offers a range of quality 'Additional Tools' selected for durability and longevity. Each product has been carefully chosen to complement your Picote Miller or Tools. Save time with Sheath Cutters, Hex Keys, Shaft Rounders, Pliers and more which you know will get the job done!

ADDITIONAL TOOLS

SHAFT ROUNDER

The Flexible Shaft should be inspected before every use. If damaged, the Shaft should be trimmed back. The Shaft Rounder is then used to smooth the end of the Flexible Shaft, preventing the user from being cut by the otherwise sharp metal edge. This also prevents the Shaft from unravelling and ensures good fit for the tools.
